Course Outline (including breakdown of theory and practical components):

Please ensure you can provide evidence based principles and/or current research-based principles in your presentation for attendees to refer to.

Where appropriate all PD undertaken should place a strong emphasis on evidence based principles. That is, it should draw upon current research-based evidence in the topic area.
PD should be relevant to participants practice and should enable them to revise, extend and/or deepen knowledge gained in training in their qualified field of practice. It can also enable practitioners to cover areas which weren't included in their particular qualification, and in doing so, allow for greater consistency across the Myotherapy profession, and greater alignment with current allied health principles and practice.

What are the qualification/pre-requisite requirements to attend this course?

Is there any course assessment?

What level of insurance does the presenter/organisation hold?

Proof of attendance is required in the form of certificate/letter of attendance or similar.

Please attach any promotional material relating to this course (website or advertising pamphlets).
